The engine may be dirty and require the removal of dirt and debris during a thorough cleaning. The engine may also be low on oil or need the air-fuel mixture adjusted upward. A leaky gasket may also require replacement to prevent further overheating issues. Fixing a smoking engine depends largely on the color of the smoke.

## **What Are Some Common Problems With Briggs & Stratton Engines?**

Briggs & Stratton manufacture engines for smaller garden equipment - and each of their engines contains a governor. This is designed to act as "engine cruise control." But if it's poorly adjusted or worn out, it can be a real problem. There's a simple way to adjust a governor so it works better.
