Otology & Neurotology — Headmirror

Trigeminal neuralgia surgery is a treatment for nerve pain (neuralgia) that is caused by the trigeminal nerve. The trigeminal nerve exits the brain directly through the skull to supply sensation to the face. The procedure frees the trapped nerve and stops the transmission of pain signals from the trigeminal nerve to the brain.. Trigeminal neuralgia, also known as tic douloureux, is a type of ...

Is Trigeminal Neuralgia Surgery Brain Surgery?

Put together by two former presidents of the Association of Otolaryngologists of India, this atlas is based on the premise that exhaustive photographic depiction of the facial nerve and its anatomical and pathological features will allow young otologists to include it as part of the mainstream ear-nose-throat surgical practice.
