technology has advanced a lot further than 10 years ago, the major manufacturers of the common rail diesel systems have been developing the use of piezo crystals in the manufacture of diesel injectors. The use of piezo crystals is down to CO₂ output and more stringent emissions regulations to reduce greenhouse gases.

In addition, the new piezo injectors developed are found to be smaller in size and lower in weight compared to the traditional injectors. With the use of Piezo Fuel Injectors, we can benefit from improved combustion control, less fuel consumption, reduced noise, improved engine performance, and a considerable reduction in emissions.
