If you are looking for Indie books, Bibliotastic provides you just that for free. This platform is for indie authors and they publish modern books. Though they are not so known publicly, the books range from romance, historical or mystery to science fiction that can be of your interest. The books are available to read online for free, however, you need to create an account with

Where To Download

Bibliotastic in order to download a book. The site they say will be closed by the end of June 2016, so grab your favorite books as soon as possible.

Conditional Probability Examples And Solutions

How to find the Conditional Probability from a word problem?
Step 1: Write out the Conditional Probability Formula in terms of the

Where To Download

problem Step 2:
Substitute in the values
and solve. Example:
Susan took two tests.
The probability of her
passing both tests is
0.6. The probability of
her passing the first
test is 0.8. What is the
probability of her
passing the second
test given that she has
passed the first test?
Solution: Example:

P (exactly one of them
will solve it) = P (A' n
B' n c) + P (A' n B n c')
+ P (A n B' n c') = P
(A') P (B') P (C) + P (A')
P (B) P (C') + P (A) P
(B') P (C') = (2/3) (3/4)
(1/5) + (2/3) (1/4) (4/5)
+ (1/3) (3/4) (4/5) =
(6/60) + (8/60) +
(12/60) = (6 + 8 +
12)/60. = 26/60. P
(exactly one of them
will solve it) = 13/30.

Conditional Probability Problems with Solutions

Solution to Example 6

Let event H: people with home insurance, event C: people with car insurance We are given $P(C) = 0.8$ and $P(H \text{ and } C) = 0.5$. We are asked to find the conditional probability $(P(H|C))$ that a person selected at random have a home insurance (H) knowing

Probability Examples And Solutions

Conditional Probability and It's Examples

The conditional sample space here still is G G, G B, B G, but the point here is that these are not equally likely as in Example 1.18. The probability that a randomly chosen child from a family with two girls is a girl is one, while this probability for a family who has only one girl is $\frac{1}{2}$.

Solved Problems Conditional Probability

Definition: If $P(F) > 0$, then the probability of E given F is defined to be $P(E|F) = \frac{P(E \cap F)}{P(F)}$.

Example 1 A machine produces parts that are either good (90%), slightly defective (2%), or obviously defective (8%).

Examples: Conditional

Where To Download Conditional **Probability**

A straightforward example of conditional probability is the probability that a card drawn from a standard deck of cards is a king. There is a total of four kings out of 52 cards, and so the probability is simply $4/52$.
