Addressable Beam Detector. The new Simplex Addressable Beam Detector combines the power and flexibility of IDNet technology with the proven performance of the FireRay 5000 optical beam smoke detector. Beam Detectors are used to provide “open area” smoke detection in situations where it is either impractical or not cost effective to use traditional point-type detectors or aspirating smoke detection.

Interconnected smoke alarms increase safety. In a Consumer Product Safety Commission (CPSC) survey of households with any fires, including fires in which the fire department was not called, interconnected smoke alarms were more likely to operate and alert occupants to a fire. 1 People may know about a fire without hearing a smoke alarm. When smoke alarms (interconnected or not) were on all ...
