The Clinical Microbiology Laboratory in the Diagnosis of ...

The ninth edition of the Manual of Clinical Microbiology reports that acid production by oxidative fermentation of lactose and sucrose by *S. maltophilia* is variable but is produced by the majority of strains, indicating that 60% and 63% of 73 strains tested were positive for these phenotypes, respectively.

Notes: Reassessment of Stenotrophomonas maltophilia Phenotype

The genus *Streptococcus* currently comprises >100 recognized species, and this number can certainly be expected to rise with the increasing availability of next-generation sequencing technologies. More than 10 novel species have been validly published in the last 5 years alone. Most of these were found in the oral cavity and gastrointestinal tract of various mammals and so far have not been ...
