Topics include: measurable sets, measurable functions, Lebesgue integral, Fatou's lemma, monotone convergence theorem, Lebesgue dominated convergence theorem and differentiation. Students taking this course are expected to have knowledge in elementary analysis. Textbooks. real Analysis by H.L. Royden; References. Real and Complex Analysis by W ...

MATH4050 - Real Analysis - 2016/17 | CUHK Mathematics

Analysis on the real number line, such as one encounters in an introductory course at the advanced undergraduate level (using, say, Rudin's Principles of Mathematical Analysis as a textbook), constitutes only a preliminary to a vast and far-reaching domain, the subject of real analysis properly so called. Hence, as a beginning graduate student, it is imperative to return to the subject and ...

Real Analysis by H.L. Royden - Goodreads

Real Analysis, 4th Edition, covers the basic material that every graduate student should know in the classical theory of functions of a real variable, measure and integration theory, and some of the more important and elementary topics in general topology and normed linear space theory. This text assumes a general background in undergraduate ...
