Restores Power to All Small Engines; Smoothes Engine Performance; Removes Deposits

SMALL ENGINE TUNE-UP - Blastercorp

Check the oil level. If it's ok, start the engine and allow it to warm up. This will make the oil easier to drain. Shut off the engine and drain the oil into a receptacle. For cleaner oil extraction, use an Oil Pump to remove the oil. Don't forget to replace the drain plug before refilling. If your engine is equipped with an oil filter, change it now. Fill the new oil filter with enough oil.

» How to Tune-Up Your Lawn Mower or Tractor

Turn the fuel valve lever to the "on" position. Start up the engine and allow it to warm up to operating temperature. Rev the engine once in a while so carbon does not build up with extended idle. If the engine dies because the rpm are too low, turn the idle adjustment screw about ¼ turn to increase the idle speed.
